

DEEKSHITH CHAKILAM – Full Stack AI Developer (Python + Flutter)

SUMMARY

Full Stack AI Developer skilled in building end-to-end GenAI applications using Python (FastAPI, RAG, FAISS, LLMs) and Flutter for high-quality front-end UI. 1+ year of professional Flutter experience combined with hands-on expertise in LLMs, embeddings, vector databases, semantic search, and Chat-with-PDF systems. Strong understanding of Retrieval-Augmented Generation (RAG) and deploying AI apps with modern tools.

SKILLS

AI & GenAI: LLMs (Groq, OpenAI), RAG, Embeddings, FAISS, Semantic Search, Prompt Engineering, Vector Databases

Python Backend: FastAPI, REST APIs, PDF Processing, SentenceTransformers, NumPy

Frontend: Flutter, Dart, UI/UX, State Management

Tools: Git, GitHub, Postman, VS Code, Android Studio

Other Languages: Java, MySQL

PROJECTS

1. Chat-with-PDF RAG Assistant (Python + FastAPI + FAISS)

Built a full RAG pipeline capable of answering questions from any PDF. Implemented chunking, embeddings with SentenceTransformers, FAISS similarity search, and LLM-powered answer generation. Exposed as REST API and tested with Flutter UI.

2. AI Chatbot (Groq LLM)

Developed a multi-turn conversational chatbot using Groq's LLM API with system prompts, context memory, and streaming response handling.

3. Semantic Search Engine

Implemented FAISS vector database to store and retrieve embeddings. Created meaning-based search across documents with top-k similarity ranking.

4. AI Text Summarizer

Built summarizer using LLM completions supporting short, medium, long and bullet-point summaries.

5. Flutter + AI Frontend

Developed a ChatGPT-style UI in Flutter that integrates with AI backend, supports PDF upload, displays chat history, and renders AI responses.

EXPERIENCE

Flutter Developer – 1 Year

- Built and maintained cross-platform mobile apps for internal and client use.
- Implemented user interfaces following clean architecture and reusable widget patterns.
- Integrated REST APIs, optimized performance, and delivered responsive UI experiences.
- Worked with Java backend for CRUD operations and MySQL DB.

EDUCATION

B.Tech – Computer Science (Year)

Portfolio available upon request. Open to AI Engineer, Full■Stack AI Developer, and GenAI roles.
